OptionsCity™ Helps Eurodollar Traders During Volatile Markets

Chicago, June 17, 2009 – The past two weeks have been quite hectic for the CME Group’s Eurodollar Options Pit. OptionsCity™ Metro software has helped the traders of the CME Group’s Eurodollar Options Pit during this tumultuous market to price their options faster and more accurately. OptionsCity™ users comprise four different trading groups in the CME Group’s Eurodollar Options Pit.

As the Eurodollar Futures and Options start to increase in volatility and volume, OptionsCity™ is adding more trading groups to this dynamic pit. OptionsCity™ software is designed to handle fast markets and allow floor traders to price strategies and manage their risk as quickly as the market moves.

“With the release of the latest version, we have enabled Eurodollar traders to view their risk in new ways, such as by expiration or by underlying. This is a great feature considering how many options and underlyings are available to Eurodollar traders.” said Victor Glava, VP Development.

OptionsCity Metro is a fully configurable electronic trading platform that creates a distinctive edge by enabling options traders to have full control over trading, safety and risk management. This state-of-the-art solution enables traders to leverage their trading knowledge and expertise into increased profits. OptionsCity helps to automate the market making and trading strategies while the innovative graphical representation and framework allows traders to expand their trading portfolio with minimum additional people.

OptionsCity is a certified ISV (Independent Software Vendor) on the CBOT, CFE, CME and NYMEX. To find out more about OptionsCity™ Metro contact us on (312) 635-1750 or e-mail us at info@Optionscity.com

About OptionsCity™ Software, Inc.

OptionsCity™ was founded in October 2006 with its headquarters in the financial district of Chicago. The company’s main product is a real-time electronic trading platform for options traders who make markets, maintain liquidity and trade on the worlds leading derivative markets. The OptionsCity™ solution solves current issues and adds new distinctive features, including creative ways of organizing and displaying data, advanced opportunity identification, increased safety and risk management, strategy automation, and revolutionized communication between traders.
