OptionsCity Introduces Metro 2.2

Chicago, July 27, 2010 – OptionsCity™ today announced the availability of OptionsCity Metro 2.2. This latest release includes major enhancements to the user interface to better cater to Equity Options traders, as well as additional price modeling functionality. In this release, OptionsCity also exposes additional API (Application Programming Interface) functionality for clients integrating their proprietary algorithmic trading engines.

“With the release of Metro 2.2 we are further embracing the needs of traders and market makers by delivering more capabilities that will allow them to excel in extreme market conditions. Taking advantage of trading opportunities in these markets is our focus as the industry continues experiencing volatile markets,” said Victor Glava, CTO and VP Development.

OptionsCity Metro 2.2 new functionality includes: connectivity to the BOX exchange; streamlined work flow for Equity Options traders; new Spread management functionality; new functionality exposed through the API for algorithmic traders; as well as additional pricing and modeling functionality.

OptionsCity Metro is a fully configurable electronic trading platform that creates a distinctive edge by enabling Options traders to have full control over trading, market making, safety and risk management. This powerful solution automates market making and trading strategies while the innovative graphical representation allows traders to efficiently expand their trading portfolio. The open API allows trading firms to modify any aspect of the system and plug in their own algorithms.

OptionsCity is a certified ISV (Independent Software Vendor) on the CME, CBOT, NYMEX, COMEX, CBOE, CFE, CBSX, ICE, NYSE AMEX, and now BOX. To find out more about OptionsCity™ Metro contact us on (312) 635-1750 or e-mail us at info@optionscity.com.

About OptionsCity™ Software, Inc.

OptionsCity™ was founded in October 2006 with its headquarters in the financial district of Chicago. The company's main product is a real-time electronic trading platform for options traders who make markets, maintain liquidity and trade on the world's leading derivative markets. The OptionsCity™ solution solves current issues and adds new distinctive features, including creative ways of organizing and displaying data, advanced opportunity identification, increased safety and risk management, strategy automation, and revolutionized communication between traders.
